Cogiscan , Mossman Tebbs and Juki Automation Systems introduce the RFID Smart Feeder Storage Cart for Juki feeders

BROMONT, CANADA, DEC 1, 2008 - Cogiscan Inc., the leading track, trace and control solutions provider for the electronics manufacturing industry, in collaboration with strategic partners Mossman Tebbs and Juki Automation Systems, is pleased to announce the introduction of the new RFID Smart Storage Cart for Juki feeders.

This new product complements the award-winning IFS-X2 intelligent feeder system that was developed in collaboration between Juki Automation Systems and Cogiscan. The new intelligent feeder storage cart will provide the capability to automatically detect all Juki intelligent feeders in offline storage carts. This will achieve an unprecedented level of visibility for all components and feeders outside of the assembly line.

According to Chris Walsh from Mossman Tebbs : “This is a significant milestone for us. We have been working with Cogiscan for some time already, incorporating their RFID technology in other models of feeder storage carts. In parallel we have been working with Juki customers to meet their demands for rugged and cost-effective feeder storage. Now we combine those two things into one very unique product. Juki customers will be able to choose from a range of feeder storage options, with or without intelligence. They can even start with the basic low-cost configuration and later upgrade to the intelligent version on their factory floor.”

Bob Black, CEO of Juki Automation Systems stated, “We are very pleased with this new product introduction. This is a great example of how we work with strategic partners to offer greater value and the lowest cost of ownership to our customers. A growing number of our new and existing customers are experiencing the benefits of IFS-X2 feeder intelligence and now they will be able to get even more value from this very powerful system. The intelligent storage cart will tell the operators exactly where to get the components and feeders that are needed for the next job or replenishment. ”

About Cogiscan Inc.

Cogiscan is the leader in Material Control for the electronics manufacturing industry. The Company offers real-time tracking, traceability, and control of all materials (feeders, components, PCBs, solder paste) throughout SMT and other assembly processes.

Cogiscan provides cost-effective and scalable solutions that ensure the right material is at the right place at the right time.

About Mossman Tebbs

Mossman Tebbs designs and manufactures a high quality range of reel racks, feeder mobiles and board handling solutions, capable of meeting the exacting demands of electronics manufacture. All our equipment is ESD safe: surfaces are coated in epoxy-polyester powder providing a static-dissipative finish. Sheet metal surfaces are zinc-plated and only conductive tire castors are used.

Our product range is constantly expanding in response to the changing needs of our customer base and as new technologies come onstream.

About Juki Automation Systems

Juki Corporation's experience as the market leader in industrial sewing machines was a stepping stone for entry into the printed circuit board assembly market in 1987. Since then, Juki has delivered more than 20,000 automated assembly systems worldwide and is currently shipping an average of 200 assembly machines per month. This extraordinary achievement makes Juki one of the world's leading providers of automated assembly products and systems. In addition to its

core technologies, Juki's Electronic Assembly and Test Systems Division develops and manufactures advanced electronic systems and computer software for data entry, mail processing, and other electronic equipment.

With the purchase of Zevatech's assets in November 1999, Juki Automation Systems now brings our reputation for top quality and reliable service to the North and South American and European electronics assembly markets. Juki recognizes the challenges of this century and is constantly responding to the globalization of electronic manufacturing. Juki is poised for continued growth in the 21st century through our sophisticated knowledge base, advanced technologies, and a high commitment to our customers.
